neno®

Every Mom is a Superhero!

Product catalogue

Neno means child. That's it. That's the clearest message we could send to the world with our products. They are dedicated for Parents, to make their daily life easier and to enjoy the time spent with their children. Neno is a Polish company that delivers products that meet your expectations of quality, that are visually attractive, practical and safe to use.

Neno products are mostly aimed at young Parents of children at the age of 0–3. Our mission and philosophy is to provide support and comfort for parents during that most beautiful, but also demanding stage of life. We are parents ourselves and know the perils of battle against colic, fever, runny noses or feeding problems, and how invaluable any amount of help is. And all of that for the sweetest reward of all – the smile of your child.

First Neno brand baby monitors, infrared thermometers and breast pumps were a smashing success. A community surrounding our products was born, composed of satisfied mothers. The process design and creation of Neno products is supported by midwives, physicians and nurses. We also cooperate with childbirth schools and lactation experts.

MADE IN POLAND 2022

Meet the Neno bottle breast pumps

1. *All Neno breast pumps are wireless and feature 2-phase or 3-phase operation*

2. *It is possible to match each breast pump with a silicone funnel in three sizes: 21 mm, 24 mm, and 27 mm. Additionally, reducers in 19 mm, 17 mm, and 15 mm are available, which fit the 24 mm funnel.*

3. *The Neno breast shields are created from soft material, which prevents chafing and irritation of the nipples.*

4. *The breast pump kit contains:*
   - *a silicone funnel in size 24 mm*
   - *a bottle with a teat for babies from the first days of life,*
   - *a bottle stand so that the bottle can be set down comfortably without fear of spilling the milk,*
   - *a stopper for convenient, clean storage of the funnels,*
   - *spare valves,*
   - *a bottle stopper to hygienically store the milk in the refrigerator.*

5. *Neno breast pumps feature a special closed system, ensuring the highest standard of safety and hygiene for breast pumping.*

Recommendation

OF THE POLISH SOCIETY OF MIDWIVES

Neno breast pumps have received an official recommendation from the Polish Association of Midwives. This proves that our products are not only appreciated by breastfeeding women, but also find recognition among experts. This is not the first such recommendation in the medical community. At the beginning of January, Anna Bulczak from the 'Zaufaj Położnej' portal has taken patronage of our products. This is a great honour for us and a motivation for further work.

What does the recommendation of the midwifery community provide?
Above all, it is proof that the recommended products are in line with current medical knowledge and safe for patients. Neno breast pumps are the answer to the most common lactation problems. The mechanisms used in Neno products – such as the third pumping phase – are designed to stimulate the breasts to produce even more milk. The third extraction phase of the Neno breast pumps combines elements of both the stimulation and active extraction phases. The solution introduced faithfully mimics a baby's natural sucking pattern, so that the glands are stimulated to work even harder.

In addition, the Neno breast pumps use 100 per cent media separation, which ensures complete hygiene and safety. The position of the diaphragm in Neno breast pumps provides a tight barrier between the bottle and the funnel and the tubes and motor of the device. This design protects the tubing and the motor of the breast pump from contact with the milk and keeps the breast milk hygienic and fresh. The closed system is used in both Neno single and Neno double breast pumps.

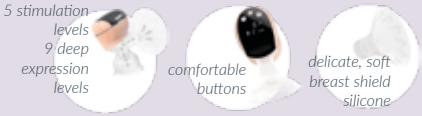
The Polish Midwifery Association is an association of midwives from all over Poland, whose tasks include raising the quality of midwifery care, as well as participating in the development of health programmes in the care of women and families. The association organises a number of educational campaigns and - like the Neno brand – supports natural breastfeeding. We are proud of the recommendation given and thank you for your trust.

neno primo

wireless single breast pump

It is a single electronic breast pump operating in two modes: stimulation and expression. Each of these modes works on 5 and 9 levels respectively. The breast pump is light and handy – you can easily put it into a bag. It delights with minimalism and simplicity. If you are not a supporter of the touch control panel, the breast pump has a classic button control system.

Dimensions: 82×67×64 mm
Charging time: 2 hours
Operation time: up to 120 minutes
Charging slot: USB type C
Amount of phases: 2-phase breast pump
Amount of stimulation phases: 5
Amount of depp expresion phases: 9
Suction power in deep expression mode: 21.7–45.4 kPa
Suction power in stimulation mode: 5.4–35.7 kPa
Package contents: pumping device, bottle for milk, breast shields cover, 24mm breast shield, bottle stand, bottle cap, teat, USB type-C cable, breast pump connector, 2×bags for storage milk, user manual
Weight: 357 g



neno uno

wireless single breast pump

Neno Uno is a smart breast pump that imitates a baby's suction in order to stimulate natural lactation. The device has 6 stimulation settings and 9 milk expression intensity levels, letting you adjust it to your needs. The breast pump also has a settings memory feature. Neno Uno is perfect for trips, vacations and time spent outdoors.

Dimensions: 81×66×62 mm
Charging port: USB type-C
Battery type & capacity: 3.7 V 1400 mAh Li-Ion
Work modes : 6 stimulation levels, 9 milk expression levels
Charging time: 2 hours
Automatic power-off: after 30 min
Suction power in deep expression mode: 18.9–42.9 kPa
Suction power in stimulation mode: 3.9–38.9 kPa
Package contents: pumping device, milk bottle, bottle stand, 2×valve, 24mm breast shield, breast shields cover, suction bowl, USB type-C cable, rubber teat for the bottle, bottle cap, user manual
Weight: 300 g

lactation support

neno

perfetto

3-phase wireless waterproof single breast pump

The threephased, cordless Neno Perfetto electronic breast pump is equipped with an IPX6 waterproof function. It is distinguished not only by its unique and elegant design but also by the presence of a third, additional phase of pumping. This mode is perfect for stimulating lactation, as it faithfully mimics the sucking movements of a baby. By using the third pumping phase, the breast is properly emptied, and — as a consequence — the mammary glands are stimulated to continue producing food.

What will you do with your

free hands?

freedom series

Meet the Neno hands free breast pumps

1. *The new Freedom Series breast pumps have been designed for women who want comfort and independence. Lightweight and portable, they allow any mother to express breast milk freely and hands-free.*

2. *Instead of bottles, the hands-free breast pump has collection cups. The cup design means you don't have to hold it in your hand. Just place it in your nursing bra.*

3. *Expressing breast milk with a hands-free breast pump frees your hands so you can do other activities such as computer work, reading or light housework.*

4. *The milk collected in the cups can be easily poured directly into the bottle.*

5. *The breast pumps are supplied with ergonomic, anatomically shaped silicone breast shields, which can be adjusted in size with reducers.*

6. *Every unit in the Freedom Series operates in the 3rd phase. The use of this innovative mode is very helpful when lactation is starting and milk stasis occurs.*

velo

3-phase hands free double electronic breast pump

The Neno Velo is a product that is the answer to the needs of mothers who appreciate convenient and practical solutions. The hands-free breast pump consists of a set of collection cups connected to a compact pump. Efficient milk expression is made possible thanks to its three-phase action (with 8 levels of regulation) and to the breast shields, the size of which can be adjusted from 24 mm to 20 mm. The lanyards supplied in various lengths allow the breastpump to be hung around the neck or clipped to a trouser belt for invaluable comfort when pumping.

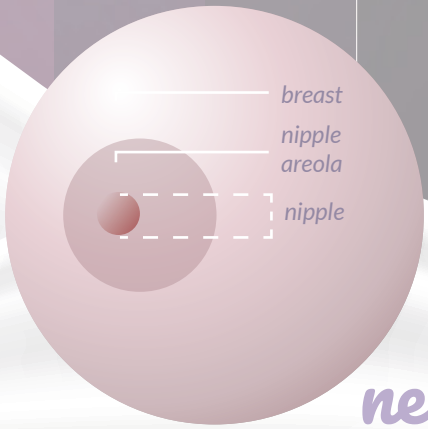
Dear mom, REMEMBER!

- The size of the nipple **can change** during lactation.
- **The correct choice of** breast shield/reducer will affect the effectiveness of pumping.
- The earliest the nipple should be measured is after **32 weeks** of pregnancy



Instructions: Measure the diameter of your nipple at the base using the measuring tape **(next page)** and then choose the right breast shield/reducer.

bambino

baby monitor with wireless receiver

The Neno Bambino is an electronic baby monitor with a receiver that can be paired with several cameras (up to 4 devices) to act as a home surveillance device. The product is ideal both for large apartments and for single-family homes with gardens, thanks to its long range (up to 100 metres indoors and up to 500 metres outdoors). In addition to the standard features useful for monitoring a toddler (two-way communication, playback of pre-recorded lullabies, night mode), it also has an aesthetic silicone casing that blends in perfectly with the décor of a child's room.

Display: 2.8 inch
Signal range: up to 300 m (outdoor), up to 50m (indoor)
Camera resolution: 640×480 px
Screen resolution: 320×240 px
Built-in accumulator (receiver): Li-Ion 2600 mAh
Frequency range: 2.412–2.472 GHz
Camera and receiver input: DC 5V 1A
Power supply input voltage: 220–240V 50–60 Hz
Night mode: up to 5m
Dimensions: receiver 119×80×37 mm, camera 65×65×106 mm
Weight: receiver 125 g, camera 93 g

neno vista

baby monitor with wireless receiver

The Neno Vista is an electronic nanny that provides high quality HD video transmission. You can keep an eye on your baby 24/7 with the included receiver, which has a 5-inch display. In addition to standard features such as pre-recorded lullabies, room temperature measurement and two-way communication, it has a long range (up to 300m outdoors) and a controllable rotating head. Another advantage is that it can be mounted in two ways - using a wall bracket or a flexible stick that can be wrapped around the cot's rail.

Screen: 5 inch
Power: DC 5V 1A
Signal range: up to 300 m (outdoor), up to 50 m (indoor)
Horizontal rotation angle: 165° left, 165° right
Vertical rotation angle: 90° top, 45° bottom
Screen resolution: 1280×720 px
Built-in accumulator (receiver) Li-Ion 3050 mAh
Frequency range: 2408~2468 MHz 19 dBm
Night mode: up to 5 m
Work temperature: -10~45°C
Dimensions: 162×86×22 mm receiver, 71×71×116 mm camera
Weight: 200 g receiver, 190 g camera

Powered by tuya Intelligence Inside

neno ivo

baby monitor with wireless receiver

The Neno Ivo is a premium electronic baby monitor designed for parents who want to keep an eye on their little ones with top quality equipment. The product stands out for its specifications, as it includes a receiver with a large display (5 inches, HD resolution) and is also integrated with the TUYA mobile app. Precise monitoring is possible thanks to a controllable head that moves vertically and horizontally. In addition to options such as pre-recorded lullabies and 4x zoom, the Nanny has a built-in sensor that detects any movement in the child's environment.

Screen: 5 inch
Signal range: up to 500 m (outdoor), up to 100 m (indoor)
Camera rotation angle: 355° horizontal, 55° top and bottom
Screen resolution: HD 1280×720 px
Built-in accumulator (receiver): Li-Poly 3000 mAh
Night mode: range up to 5 m
Frequency range: 864–866 MHz, 2.412–2.472 GHz
Power adapter voltage input: 220–240V 50–60 Hz
Camera and receiver input: DC 5V/1A
Dimensions: receiver 160×80×16 mm, camera 82×85×119 mm

aurora

electronic bouncer for children

The Neno Aurora is a product designed for use from the first day of a baby's life. The modern electronic rocker offers an alternative to natural rocking. It is based on a pendulum movement with 5 speed settings, which calms and soothes babies and ensures comfortable sleep. The main advantages of the rocker are its modifiable design (removable canopy and cover, removable toys and pillow), pre-programmed lullabies and the possibility of BT pairing with other devices.

neno nube

electronic bouncer for children

Neno Nube is an electric baby bouncer with BT connectivity. It plays your beloved music from your smartphone. Use the remote pilot included in the set to control the sound, swaying and rocking frequency. The swinging rocking motion resembles an infant's natural cuddling stimulating development. The stabilizing "ultrasafe" system and 5-point technology to support the baby guarantees safety and proper positioning of the infant. Baby bouncer has a removable top and mosquito net. It is a comfy solution for the parents and a relief from the daily carrying of the baby.

neno

gusto

fruit teat with spoon

The Neno Gusto is a useful accessory when it comes to expanding your child's diet. The practical teat is made of high quality plastic that does not contain harmful bisphenol A. It is ideal for serving fruit and vegetables, and the accompanying spoon makes it easier for your child to consume mousses and purées as he or she learns to eat independently.

Material of the container, nipple and spoon: silicone
Temperature range: -20°C–100°C
Handle, cap and plug material: PP
Capacity: 30 ml
Included: silicone container, nipple for serving fruits, spoon, cap with measuring cup, hanger, user manual
Dimensions: 147×82×49 mm
Weight: 67g

neno

lucy

foldable baby bathtub

The Neno Lucy is a practical bath made from high quality materials that are safe for your baby's health. It is lightweight and foldable, so it is easy to transport. This makes it ideal for use both at home and when travelling. The bath has a water temperature thermometer and an adjustable insert for easier support of your baby. The Neno Lucy is also equipped with non-slip feet to ensure stability during bathing.

For children up to 30 kg
Material: PP+TPE
Capacity: 46 L
Included: baby bathtub,
bath support net,
thermometer, user manual,
Dimensions of the unfolded product: 89×52×24 cm
Dimensions of the folded product: 89×52×11 cm
Bathtub weight: 2.8 kg
Bath support net weight: 0.15 kg

neno

lucy stand

foldable baby bathtub with the stand

The stand is designed for use with the Nneo Lucy bathtub. It provides stability thanks to its non-slip feet. The appropriate height facilitates bathing, relieving the parent's back and eliminating the discomfort of bending over. It is a practical solution that increases comfort during the daily care of the little one.

For children up to 30 kg
Material: PP+TPE
Capacity: 46 L
Set contents: bathtub
frame with stopper and drainage pipe
adjustable bath liner
thermometer, user manual
Bath tub dimensions when unfolded: 89 × 52 × 24 cm
Dimensions of tub when folded: 89×52×11 cm

neno

vapore

portable mesh nebulizer

The cordless, quiet and compact nebuliser is ideal for the whole family. The medical device allows you to adjust the intensity of the nebulisation by selecting the speed (3 levels). Three masks and a mouthpiece are included, making it suitable for users of all ages. The nebuliser produces particles with an MMAD of less than 5µm and has a high respirable fraction of 65%, meaning that the medication is adequately absorbed in the lower airways. What's more, it's easy to use and light enough to be perfect for home or travel.

Power: DC 3.7 V
Lithium-ion battery 750 mAh
Power consumption: <4.0 W
MMAD particle size: <5 µm
Nebulisation rate: 0.15–0.90 ml/min (3 speed modes)
Medication container capacity: 6 ml
Operating modes: constant and variable (10 minutes cycle)
Sound level: ≤50 dB
Dimensions of main unit with medication container and membrane: 7.25×6.75×5.05 cm
Weight: 72 g

neno

medic to8

contactless thermometer for measuring temperature

The Neno Medic T08 non-contact forehead and ear thermometer is a device that is used to measure body temperature in a quick, convenient and hygienic way. The use of infrared technology allows for non-contact temperature measurement in different parts of the body, making it particularly convenient for children and people who do not like traditional contact thermometers.

Measurement range: 32.0 – 42.9 °C (89.6 – 109.2 °F)
Measurement accuracy: ± 0.2°C in the range 35.0 – 42.0°C (± 0.4°F in the range 95.0 - 107.6°F); ± 0.3°C (±0.5°F) in the ranges 32.0 – 35°C and 42.0 – 42.9°C (89.6 - 95°F and 107.6 - 109.2°F)
Display accuracy: 0.1°C/0.1 °F
Clinical repeatability: ±0.3°C/0.5 °F
Automatic off: yes, after 8 seconds of inactivity
Units of measurement: degrees Celsius (°C) or degrees Farenheit (°F)
Batteries: 2×AAA, DC3V, included
Weight: 93 g (with batteries)
Dimensions: 151×48×42 mm
Operating temperature: 10.0 – 40.0°C (50.0 – 104.0°F)
Storage temperature: -25.0 – 55.0°C (-13.0 – 131.0°F)
