Discover
Neno Beauty Luve

A breakthrough in shaping the facial contour – without needles and discomfort. Microcurrents improve facial tone, firm the skin, help visually smooth expression lines and visible wrinkles, giving the face a younger appearance. Electroporation increases skin permeability, enhancing the absorption of creams. EMS improves facial contour and reduces skin sagging. Four types of LED light help reduce visible imperfections, discoloration and improve radiance and firmness of the skin. Wrinkles do not define age. But with Neno Beauty Luve, you can influence how your skin looks.

Exclusive Series

Recommendations for *Neno Beauty Luve*

Visible lines and expression wrinkles.

- *Loss of jawline definition.*
- *Skin lacking firmness, requiring radiance and natural glowing GLOW.*
- *Visible signs of aging.*
- *Skin requiring firming.*
- *Loss of a vital-looking complexion*

Exclusive Series

Why are the effects
of using Neno Beauty Luve so spectacular?

Neno Beauty Luve combines modern technologies: microcurrents, micro-impulses, electroporation, EMS and 4 LED light wavelengths – which means comprehensive anti-aging, regenerative, lifting action with the effect of deep refreshment and freeing the skin from signs of fatigue. Using the device is like a series of professional treatments at home — without visiting a salon, without pain and without long recovery time, with results you can see and feel.

After 7 day – my skin is different.

- more radiant and rested complexion,
- even skin tone – healthy glow without filters,
- feeling of deep refreshment and immediate comfort,
- better absorption of cosmetics – creams and serums start working faster.

After 14 days – wow, what happened to my wrinkles?

- less visible lines and wrinkles,
- more elastic and tightened face,
- even skin tone and reduced redness,
- the skin becomes smooth, looks more nourished and cared for, even without makeup.

After 30 days – is this really my skin?

- reduction of signs of aging,
- the skin is firmer, smoother and more elastic,
- natural, healthy glow

***Professional care** in your own home*

Neno Beauty Luve is an advanced facial care device that combines 4 modes and 5 intensity levels, giving you full control over each treatment. Discover the possibilities offered by Neno Beauty Luve: Professional care in your home

AIR SHOT - structure architect (Blue LED)

Feel the power of refreshment. High-frequency micro-impulses and vibrations immediately improve skin structure and tighten pores. This perfect "base" for further skincare makes your skin absorbent like a sponge, ready to take in every drop of luxurious serum.

BOOSTER - hydration injection (Yellow LED)

Use the power of electroporation to "push" active ingredients into the deepest layers of the epidermis. Yellow light and vibrations stimulate microcirculation, giving a Glass Skin effect – skin so hydrated and radiant that you won't want to apply makeup.

MC - youth generator (Green LED)

Stop time with microcurrents that stimulate collagen production at the source. Green light soothes and evens out skin tone, while MC technology "irons" lines and wrinkles. This is your daily ritual of densifying the skin and restoring its youthful vitality.

DERMA SHOT - express lifting (Red LED)

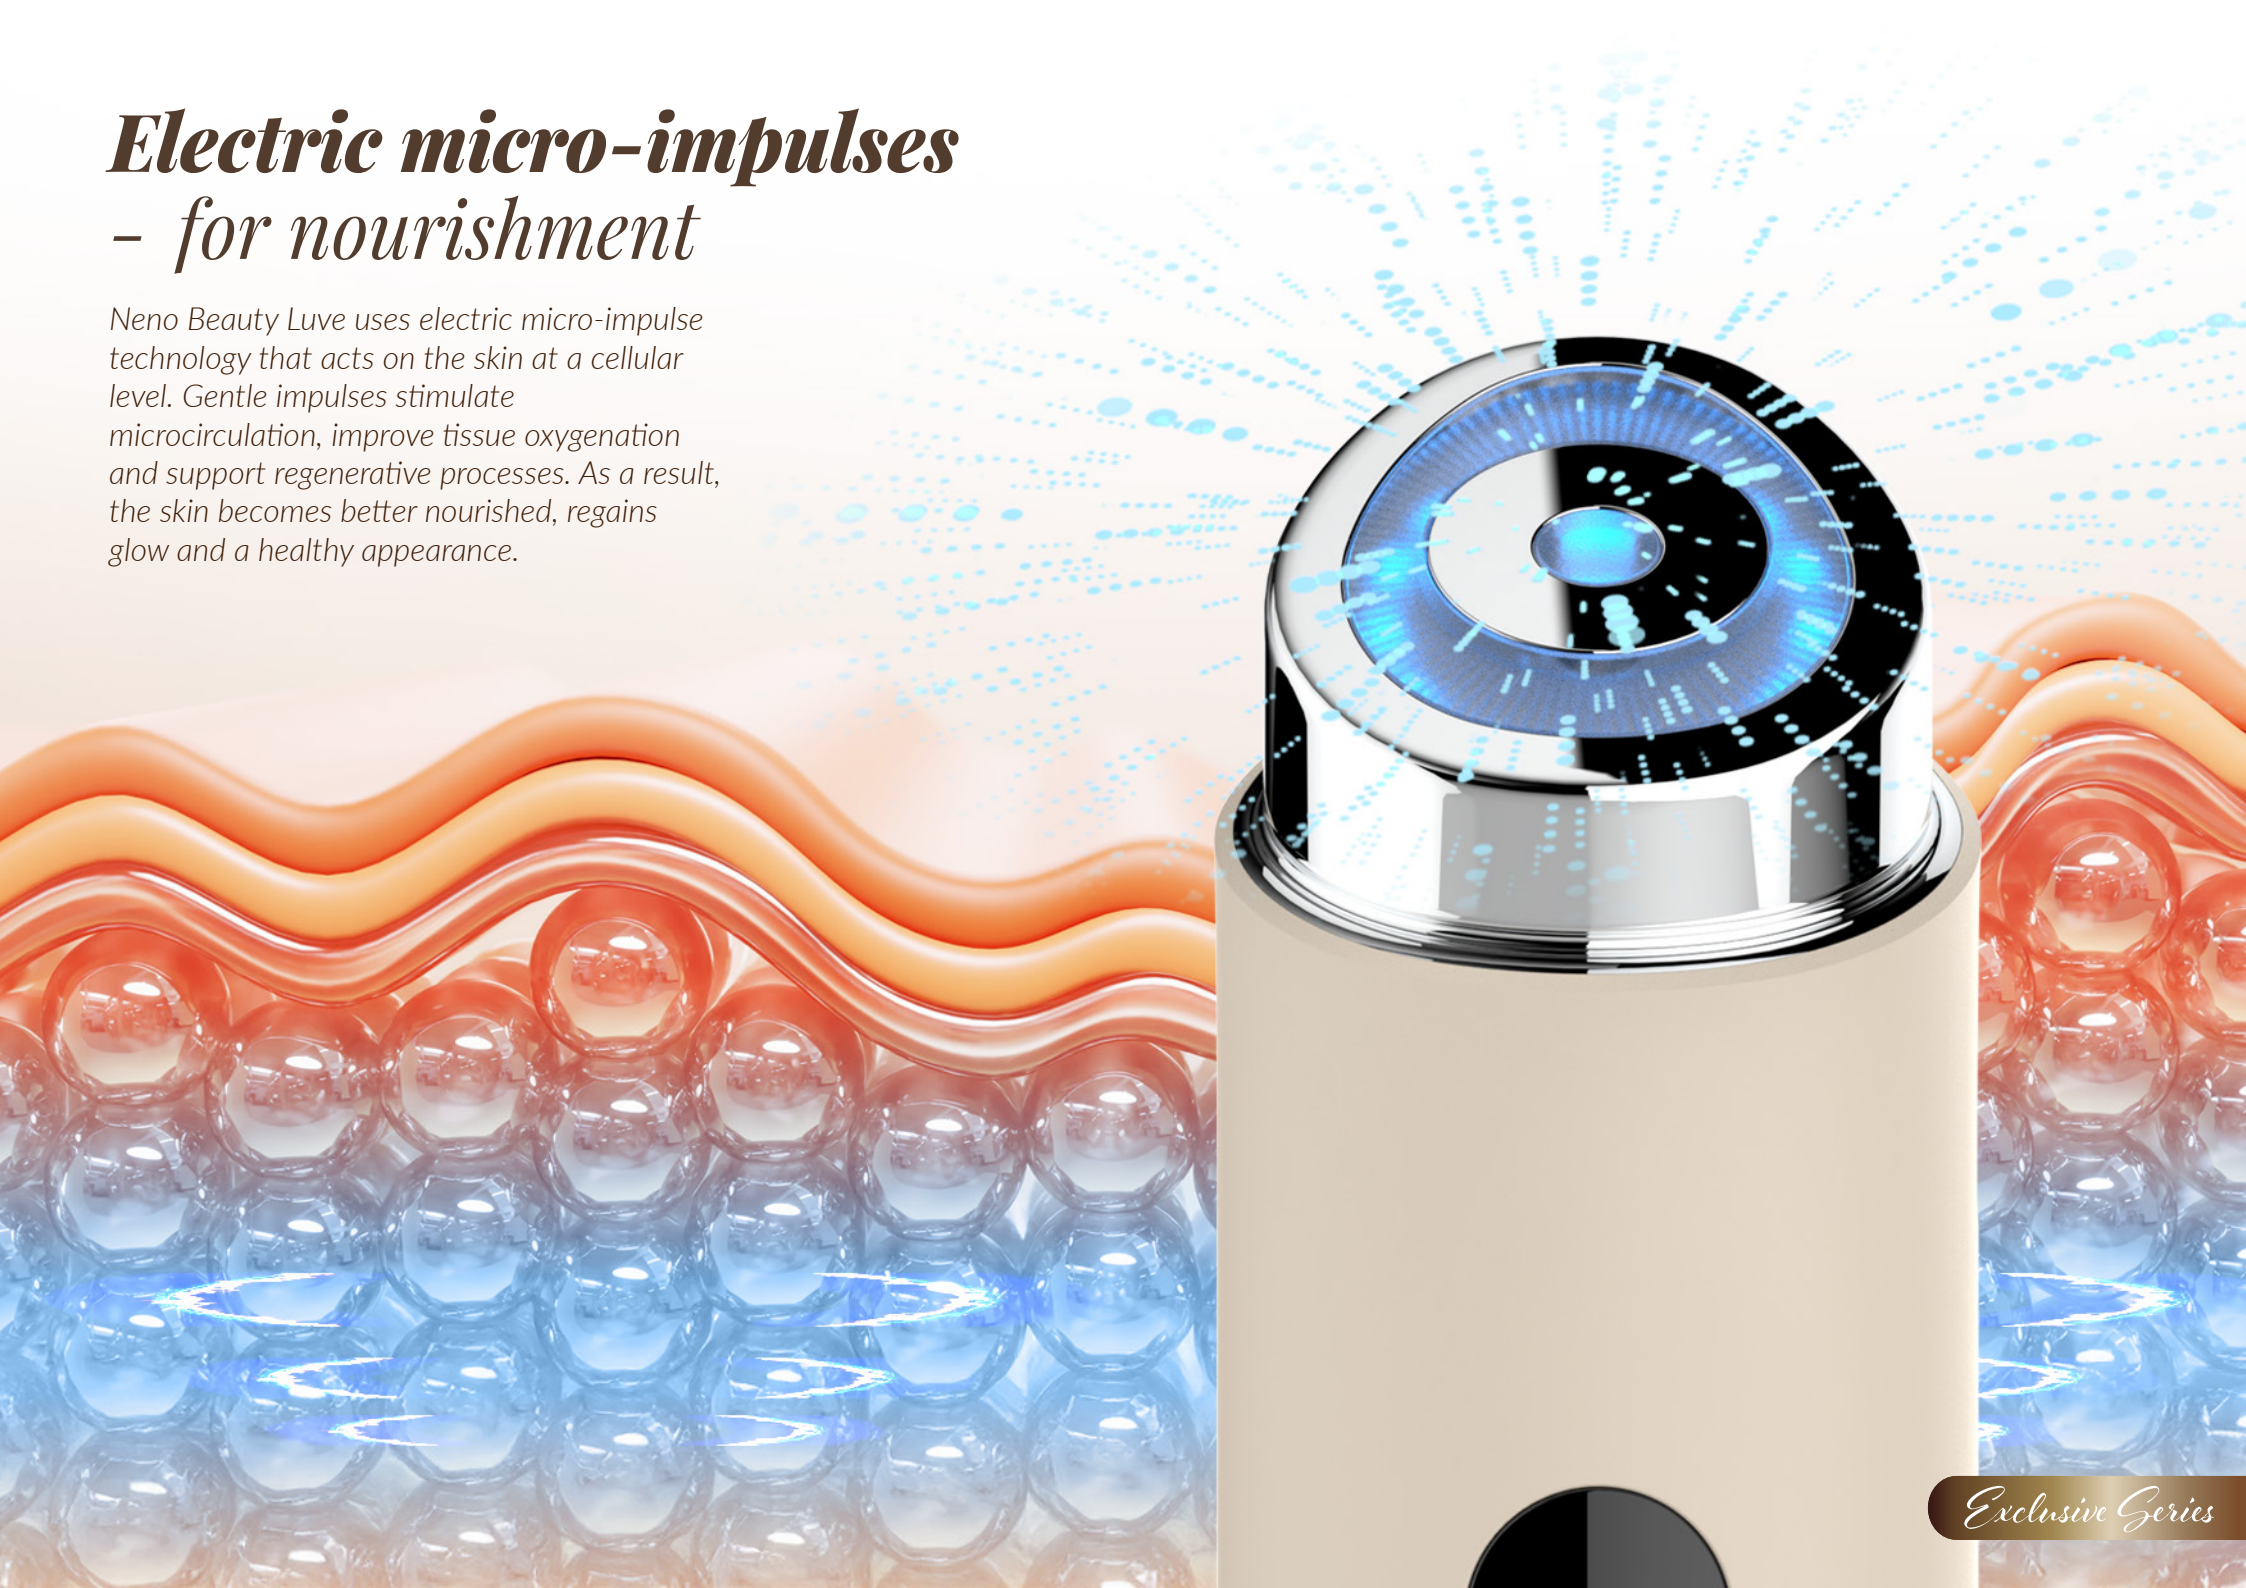

Your personal gym for facial muscles. Thanks to advanced EMS technology and red LED light, this mode intensely firms, shapes the jawline and lifts the contour. Effect? A visibly sculpted, tightened and energized face – like after a professional manual lifting.

Exclusive Series

Electric micro-impulses – for nourishment

Neno Beauty Luve uses electric micro-impulse technology that acts on the skin at a cellular level. Gentle impulses stimulate microcirculation, improve tissue oxygenation and support regenerative processes. As a result, the skin becomes better nourished, regains glow and a healthy appearance.

Exclusive Series

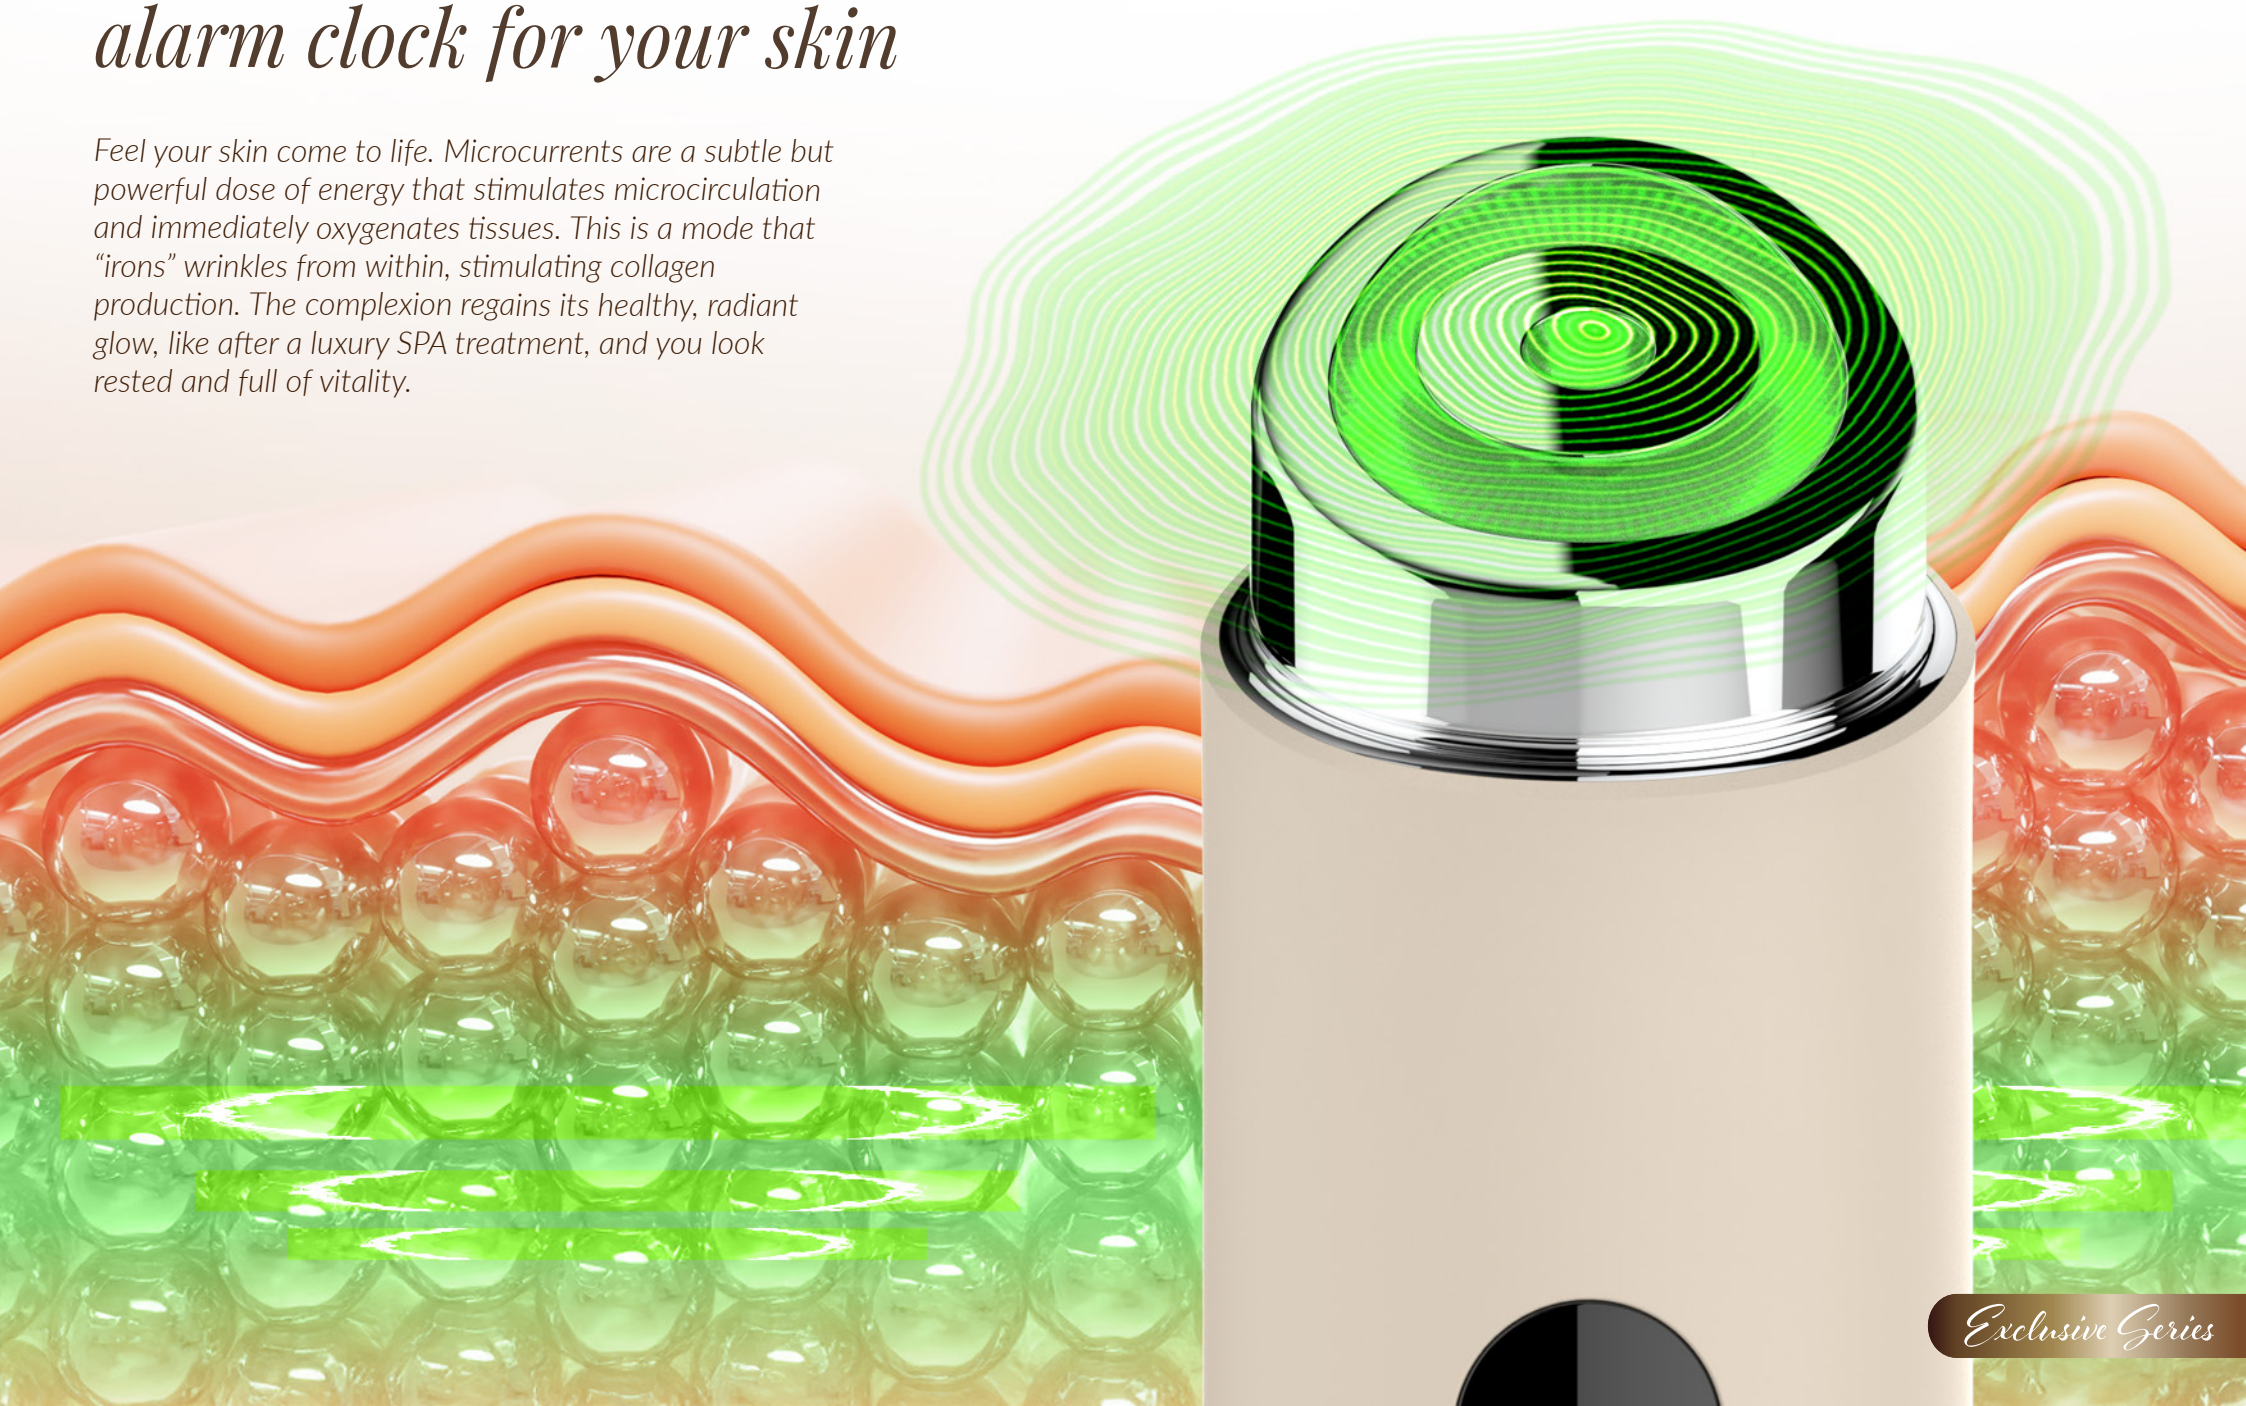

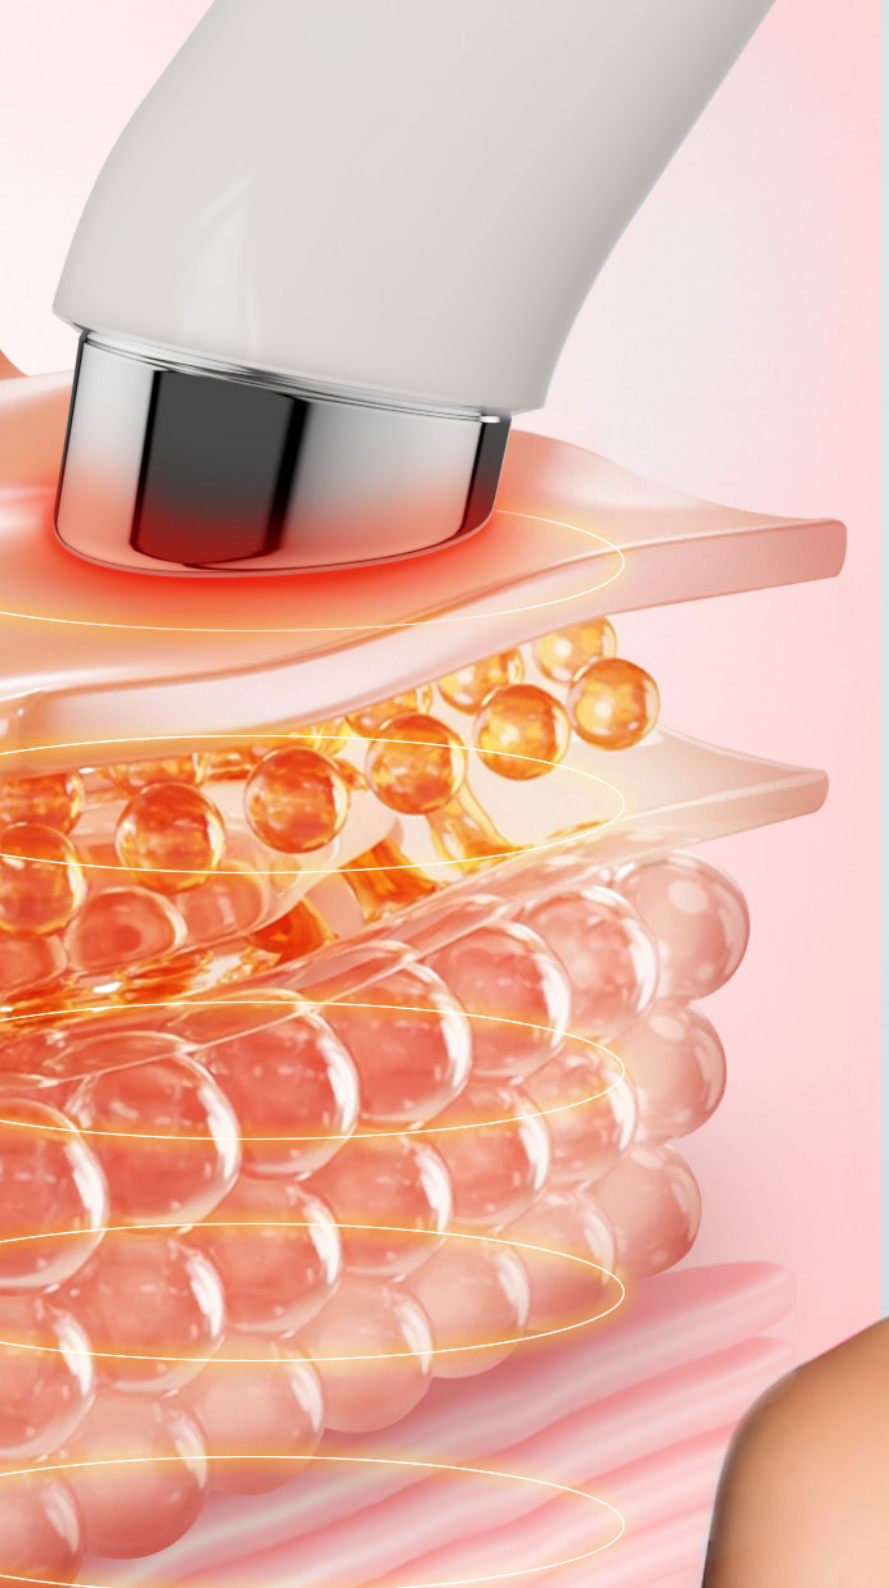

Electroporation

Your cosmetics deserve to work deeper. Electroporation is a revolutionary technology that "opens the door" to your skin cells. Active ingredients from your favorite creams and serums do not stay on the surface, but are literally pumped deep into the skin. It is professional needle-free mesotherapy in the comfort of your bathroom – the effect? Skin saturated with nutrients, extremely hydrated and regenerated from within.

Microcurrents *– a biological alarm clock for your skin*

Feel your skin come to life. Microcurrents are a subtle but powerful dose of energy that stimulates microcirculation and immediately oxygenates tissues. This is a mode that "irons" wrinkles from within, stimulating collagen production. The complexion regains its healthy, radiant glow, like after a luxury SPA treatment, and you look rested and full of vitality.

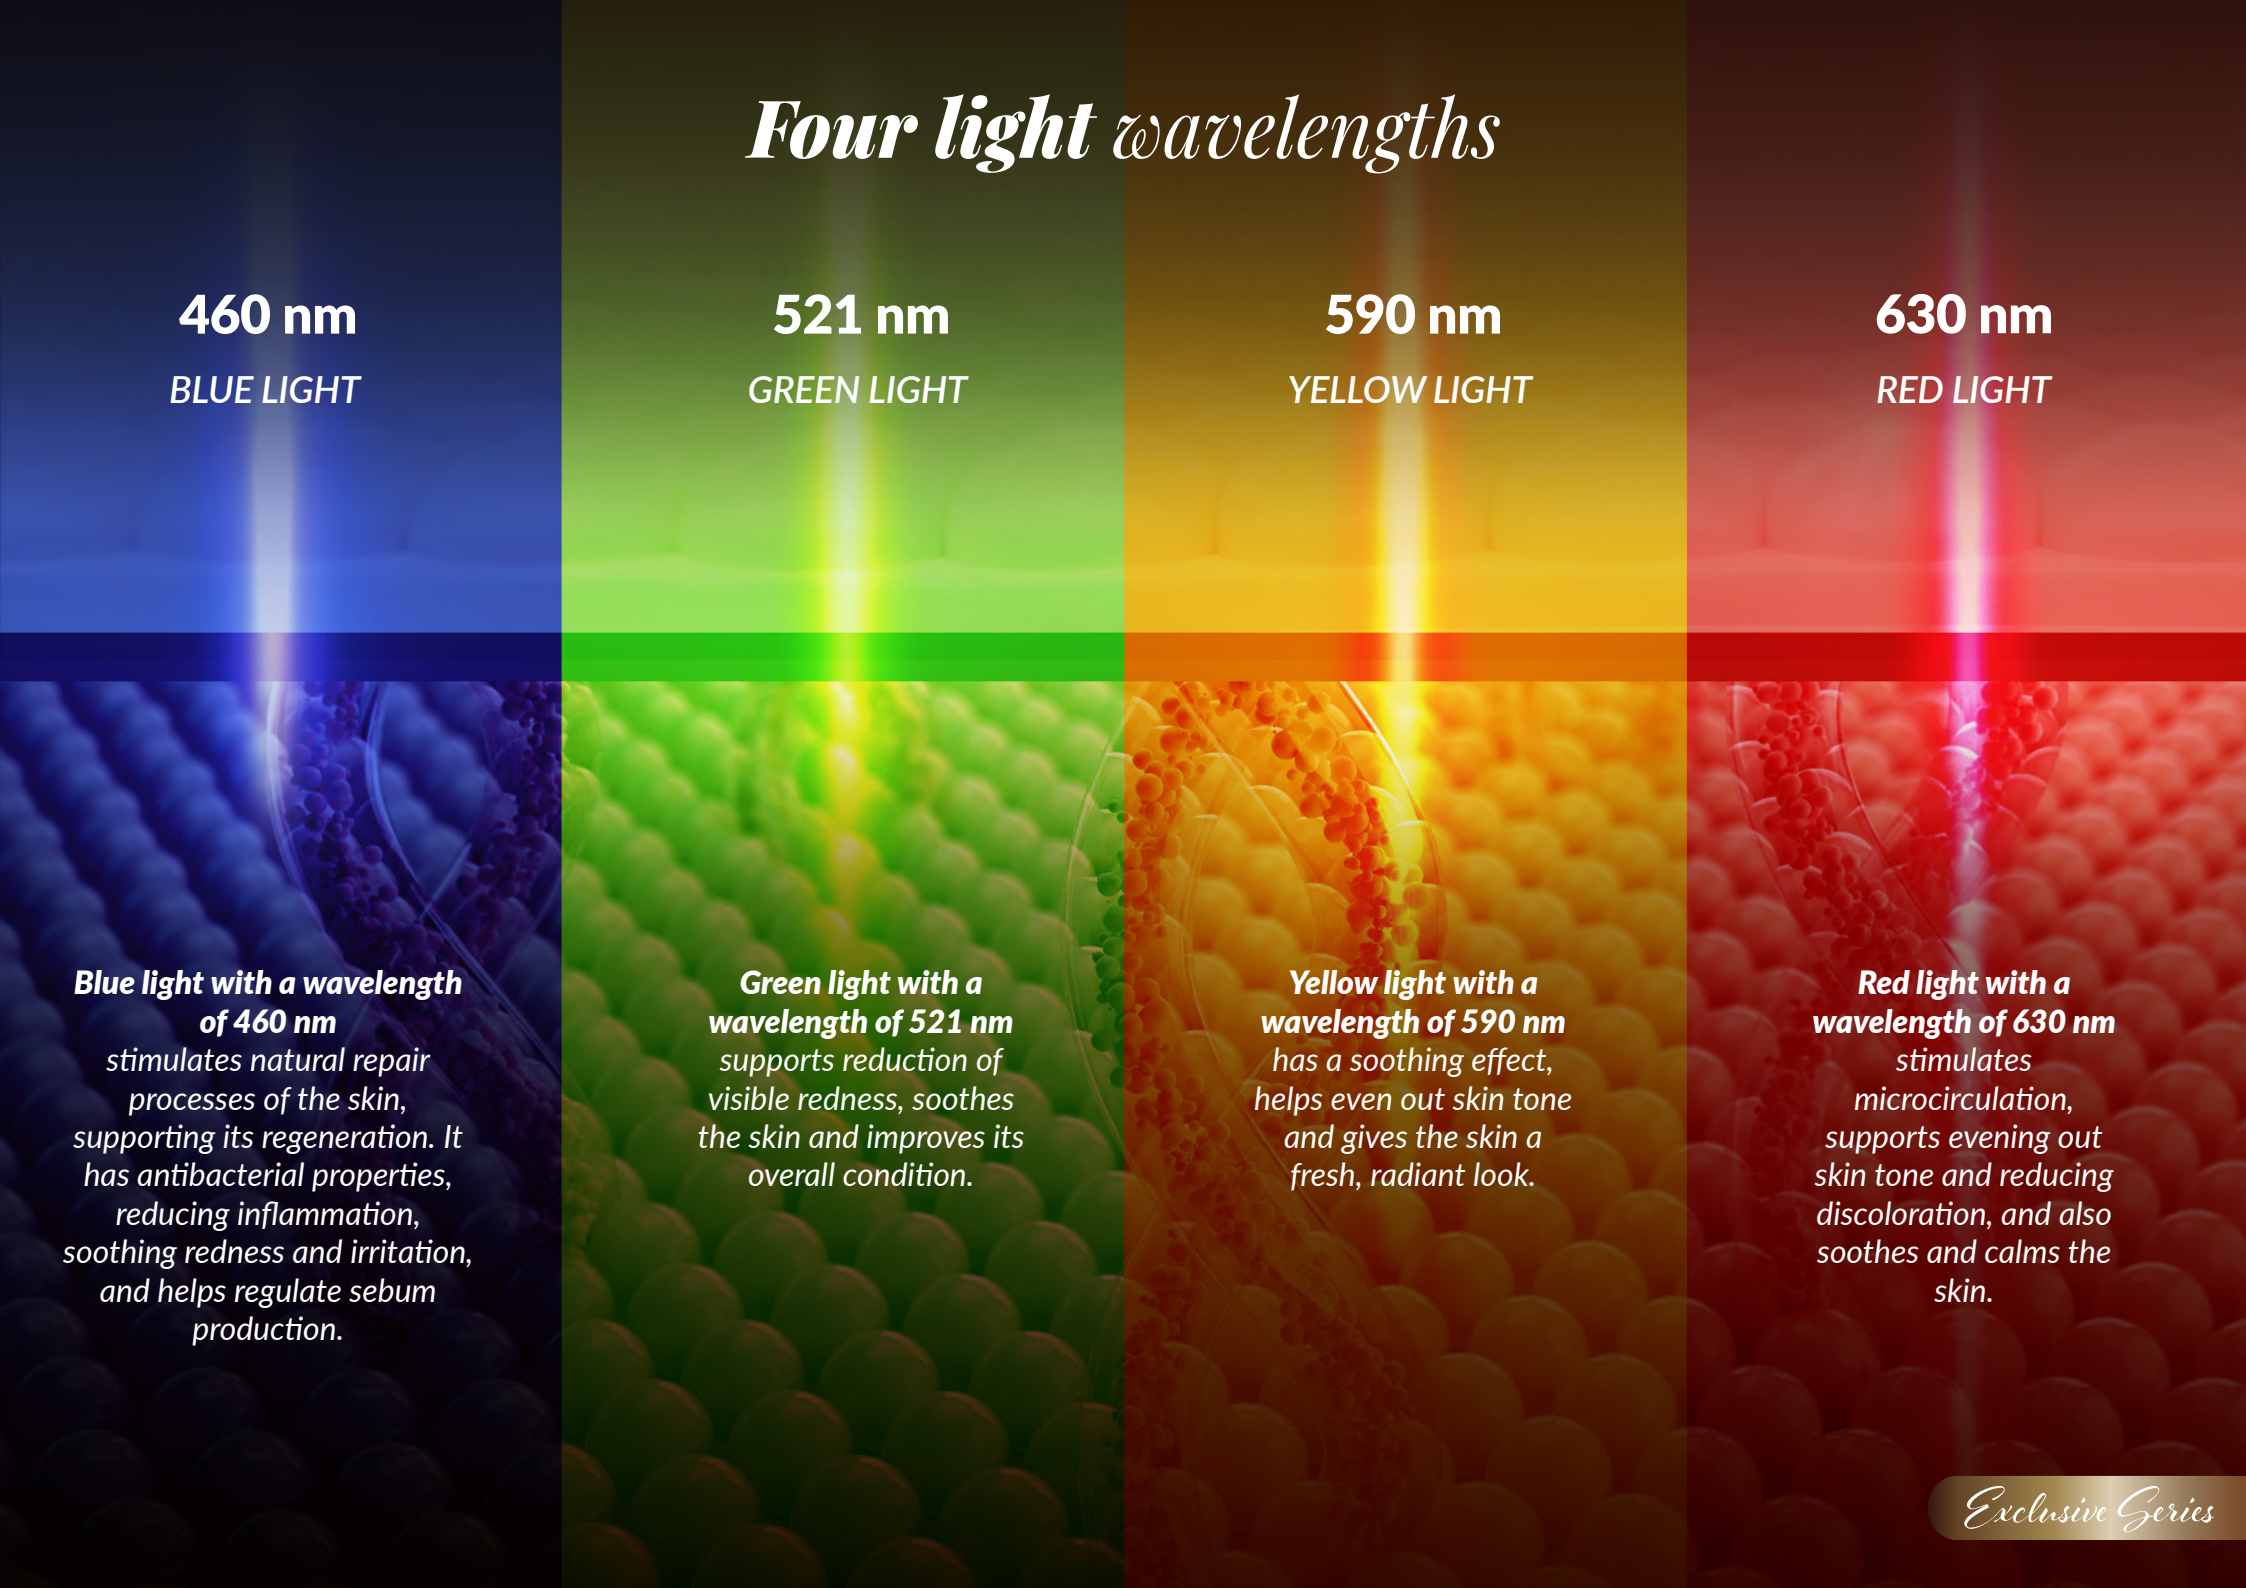

EMS
technology

The strongest strike in the fight against gravity. EMS is an intelligent training that does for your face what the gym does for the body. Instead of masking problems, it targets their source – the muscles. Thanks to intense stimulation, your jawline regains sharpness and cheeks lift, restoring a youthful contour. This is your personal sculptor, taking care every day that your skin is firm, elastic and incredibly toned.

Four light *wavelengths*

460 nm

BLUE LIGHT

Blue light with a wavelength of 460 nm
stimulates natural repair processes of the skin, supporting its regeneration. It has antibacterial properties, reducing inflammation, soothing redness and irritation, and helps regulate sebum production.

521 nm

GREEN LIGHT

Green light with a wavelength of 521 nm
supports reduction of visible redness, soothes the skin and improves its overall condition.

590 nm

YELLOW LIGHT

Yellow light with a wavelength of 590 nm
has a soothing effect, helps even out skin tone and gives the skin a fresh, radiant look.

630 nm

RED LIGHT

Red light with a wavelength of 630 nm
stimulates microcirculation, supports evening out skin tone and reducing discoloration, and also soothes and calms the skin.

Exclusive Series

Sonic *vibrations*

Specially developed vibration patterns of Neno Beauty Luve improve firmness and elasticity of the skin.

Exclusive Series

Intuitive care *– you relax, Neno Beauty Luve works*

Care with Neno Beauty Luve is simpler than you think. Our modes are designed to intuitively guide you to your goal:

1.Prepare the base (Air Shot mode):
Start with dry skin. Short impulses will open microchannels, preparing the skin to receive the best.

2.“Feed” the skin (Booster mode):
Apply your favorite serum with hyaluronic acid or vitamin C. The device will “push” active ingredients where the magic happens.

3.Sculpt and lift (MC & Derma Shot modes):
Apply conductive gel and perform smooth upward movements. Feel your muscles tighten and your facial contour regain a youthful shape.

You do not need to look for specialized medical products. Look for products labeled as:
1. Gel for RF and EMS treatments (the safest option).
2. Lightweight, oil-free gel serum (e.g. with hyaluronic acid or aloe).
3. Avoid oil-based products and heavy creams during treatment – fat is an insulator that will block the action of current and radio waves.

Exclusive Series

Your beauty code –
safety and hygiene rules

Maintain hygiene *– after each use, clean the device by wiping it with a dry or slightly damp cloth with warm water and a bit of mild soap. For disinfection, wipe the head with a cloth soaked in isopropyl alcohol (up to 70%). Avoid aggressive detergents, bleach and immersing the device in water.*

Absolutely avoid use on implants *– do not use the device if you have any electronic implants (e.g. pacemaker, insulin pump) or metal implants in the head and neck area (including dental implants, bridges, crowns, orthodontic appliances, metal hearing implants).*

Avoid sensitive areas *– do not use the device directly under the eyes, on eyelids or on the neck in the thyroid area. Around eyes, nose and mouth always use the lowest intensity level.*

Regularity *– best results are achieved with regular use:*

Airshot mode: *2–3 times a week (max. 5 minutes);*
Booster mode: *1–3 times a day (5–10 minutes);*
MC mode: *1–3 times a day (5–10 minutes);*
Derma Shot mode: *1–3 times a day (5–10 minutes).*

Use of the device is strictly contraindicated during pregnancy and lactation.

Before use, read all precautions included in the user manual

Your personal beauty guardian

Neno Beauty Luve thinks for you! LED light and timer activate only when in contact with the skin. What does it mean? Zero risk of accidental light exposure to the eyes. Precise 5 minutes of pure care (the timer counts only actual work!). Safe, smart and always under control for a "wow" effect!

Exclusive Series

Akcesoria included

Neno Beauty Luve is equipped with a practical cap that protects the massage head from dust and dirt, as well as an elegant storage pouch. The cap ensures the device remains clean and ready to use, and the soft pouch works perfectly both at home and while traveling. This way, Neno Beauty Luve maintains its aesthetic look and is always within reach.
