Neno Beauty Mica

Experience the innovative thermo-sonic brush Neno Beauty Mica. Sonic pulsations effectively remove sebum, makeup residue, impurities, and SPF that regular hand cleansing can't fully wash away. Smoother, more even skin after just a few uses. Your skin regains balance, is deeply cleansed, and this helps reduce imperfections. Micro-vibrations act like a gentle exfoliation — removing dead skin cells without irritation.

Why does *Neno Beauty Mica* work better than regular face washing?

Because your hands only cleanse the surface, while sonic technology works deeper — faster, more precisely, and more evenly. It's a daily 2-minute beauty treatment that truly transforms your skin. The result? Clean, healthy-looking skin.

– noticeably smoother, softer skin

– foundation and powder apply more easily and look better
After just a week, it's clear — this is more than cleansing, it's a skincare upgrade.

After 14 days – real improvement in skin condition

– smoother texture and fewer imperfections
– reduced oiliness
– more even skin tone, like after a BB cream
– healthier, more cared-for appearance
Your skin starts to look like after regular facial treatments.

After 30 days – healthy, perfected skin effect

– refined, smooth texture
– pores less visible even without makeup
– natural glow without highlighter
– skincare products absorb faster and work more effectively

Consistent, thorough cleansing is the foundation of effective skincare.
Without clean skin, even the best serum won't work to its full potential.

Thermo-Sonic Technology – *warmth that releases beauty*

Mica is the only brush that "dissolves" impurities, heavy makeup residue and SPF. The gentle heating function opens pores and softens the epidermis, making cleansing deeper than ever before. This soothing warmth prepares your skin to absorb creams and serums, enhancing their effect.
